PROFESSIONAL SUMMARY

M.S. Data Science candidate at NYU with engineering experience building ML systems for production. Combines strong software engineering fundamentals with experience in model development and data infrastructure.

EDUCATION

New York University, Center for Data Science *Expected May 2028*

M.S. Data Science

Western Governors University *2025*

B.S. Computer Science (completed remotely while working full time)

University of Delaware *2021*

B.S. Mechanical Engineering

PROJECTS

TennisIQ - Machine Learning Match Prediction | *Python • scikit-learn • AWS EC2/RDS • PostgreSQL • Django*

- Engineered a leakage-safe temporal feature pipeline over 200,000+ ATP matches using strict as-of-date filtering; built 50+ pre-match features including rolling surface win rates and Bayesian-shrunk H2H momentum
- Trained a calibrated logistic regression and random forest ensemble with TimeSeriesSplit cross-validation; tuned blend weights via grid search on validation folds, reaching 68% accuracy on held-out test data
- Deployed as a Django REST API on AWS EC2 with automated daily retraining,and a normalized 8+ table PostgreSQL schema

WORK HISTORY

SSOE Group - Mechanical Engineer & AI Governance Lead *New York, NY | Jun 2023 - July 2026*

- Led AI adoption as Enterprise AI Champion for an 80-person engineering division: evaluated LLM tooling, established usage guidelines, and presented recommendations to executive leadership
- Developed a RAG copilot for internal engineering standards using LangChain, pgvector, FastAPI, PostgreSQL, and Docker, enabling cited answers to design-requirement queries
- Built Python pipelines to parse, validate, and transform engineering datasets, reducing manual processing time and improving data traceability
- Coordinated data flow and reporting across mechanical, electrical, and structural teams on large capital projects, including a $1.5B EV assembly facility

ICT - Mechanical Engineer *Nashville, TN | Feb 2022 - Jun 2023*

- Designed HVAC systems for commercial and industrial facilities.

SKILLS

- **Languages**: Python, SQL, TypeScript/JavaScript, Java
- **ML & data**: scikit-learn, pandas, NumPy, feature engineering, model calibration, Matplotlib/seaborn
- **LLM systems**: RAG, LangChain, pgvector, prompt engineering, LLM output evaluation
- **Backend & infrastructure**: FastAPI, Django, PostgreSQL, Docker, AWS, GitHub Actions, pytest
